How?

PIVOT will work in partnership to develop a person centred action plan to achieve agreed outcomes that will make a real difference.

This includes:

- transport and settling at home for people who have no means of getting home from hospital, or who need to attend health appointments at short notice. Wheelchair accessible transport is available.
- signposting and referrals for information and advice, and to additional help and support including other third sector, health and statutory services.
- access to a rapid response service for small adaptations within the home and home safety checks.
- practical and emotional support, including shopping, light housework, laundry, prescription collections and welfare calls.

The PIVOT Project is provided by a partnership of Voluntary Organisations in Pembrokeshire.
